

Muscles Web Quest

Click on the link below. Read through the website (be sure to click on the next pages) and use it answer the questions below in your notebook. **Write the questions and your answer.** These are your notes!

<http://www.kidshealth.org/kid/htbw/muscles.html>

1. Humans have over _____ muscles.
2. What are muscles made of?
3. What are the 3 types of muscles?
4. What are smooth muscles and what do they do?
5. List 3 places you can find smooth muscles.
6. Are smooth muscles voluntary or involuntary? Why?
7. Where is the only place you can find cardiac muscles?
8. Are cardiac muscles voluntary or involuntary? Why?
9. What are skeletal muscles what do they do?
10. What are skeletal muscles sometimes called?
11. Are skeletal muscles voluntary or involuntary? Why?
12. What are tendons?
13. Where do facial (face) muscles attach?
14. What do facial muscles do?
15. Name the muscle that's attached only at one end.

When you are done with writing out those 15 questions and their answers, go to this link:

<http://studyjams.scholastic.com/studyjams/jams/science/human-body/muscular-system.htm>

When you get there, go through the slide show to learn more about muscles and then take the quiz.

After that, if you still have time go to this site <http://discoverykids.com/articles/your-muscular-system/> and read through the article. Come up with two interesting pieces of information from the article and think of two questions you have after reading through the article.
