

Scientists

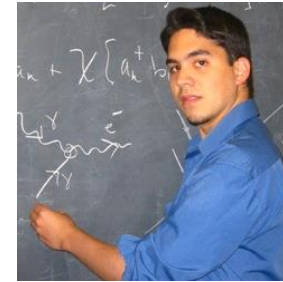

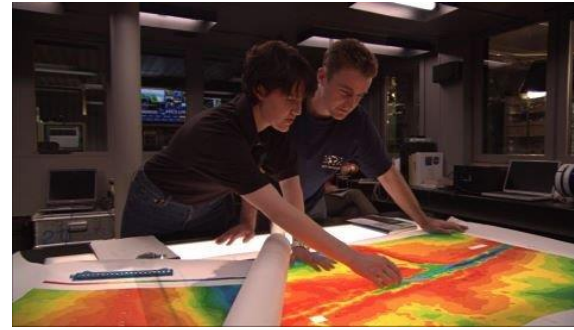

Typical Idea of a “Scientist”

But really...

Drawings

1. Insert a picture of a scientist
2. Add a textbox to label your picture
“scientist”
3. Research into scientists to learn about where they work, what tools they use, etc.
4. Add pictures or words about what you found out to your Drawings

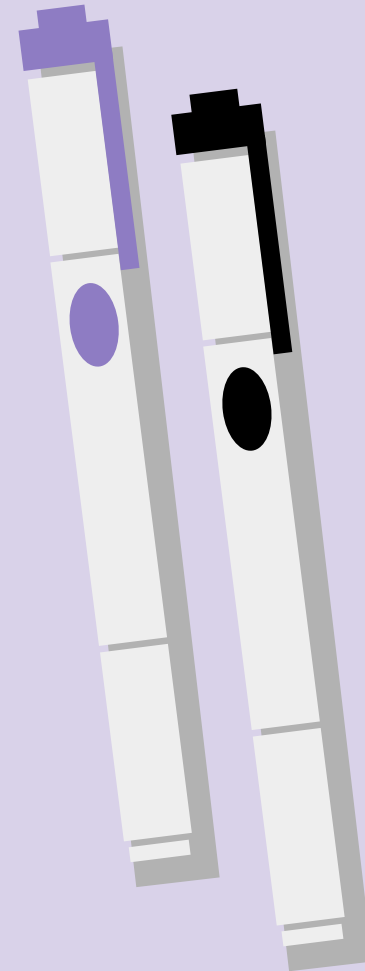

GOOGLE DRAWINGS

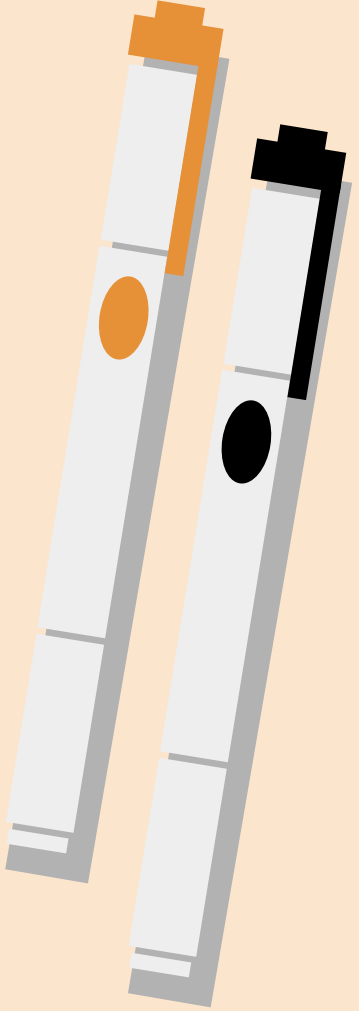

basics

Anyone
want to
share their
poster?

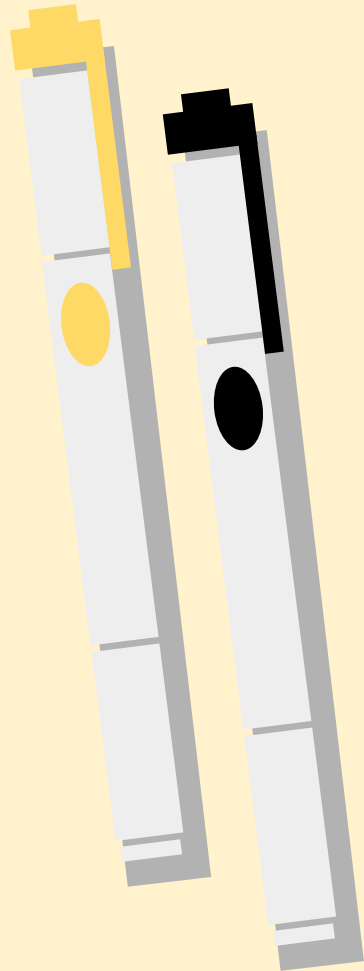

What is a scientist?

“If you’re a scientist by trade, rethinking is fundamental to your profession. You’re paid to be constantly aware of the limits of your understanding. You’re expected to doubt what you know, be curious about what you don’t know, and update your views based on new data. Being a scientist is not just a profession. It’s a frame of mind where we’re searching for the truth: we run experiments to test hypotheses and discover knowledge.”

- Think Again by Adam Grant

Final
Thoughts

So, in conclusion, who
is a scientist?

Everyone and anyone
who asks questions
about the world
around them, makes
observations, looks for
information, or tries to
solve problems.

This includes you!
