
Constellations

— Pictures in the Sky! —

Overview of Constellations

How constellations 'move' from our viewpoint

Now that you have background on constellations...

Let's dive more in-depth into constellations!

- Good info about constellations and where to find them [here](#)
- Key to finding the constellations [here](#)
- NASA's page on constellations [here](#)
- April's constellations [here](#)
- Details (click on the picture) on common constellations [here](#)

Zodiac Constellations

Astrology vs Astronomy

Hey, I recognize those Zodiac constellations Miss Johnson!

Yep! Those are the same Zodiacs used in horoscopes and your 'sign' is based on when you were born.

The constellations are the same, but how they are used is one difference between astrology vs astronomy.

Now read about the stories behind the constellations

Go to [this](#) website and read through some of the stories behind the constellations.

You do not have to read through all of them (because there are a lot!) but just browse through the stories so you can get an idea of the types of stories that are behind the constellations.

When you are done reading through some of these stories, you are done with this lesson. Have more time? Read through more stories!
