

Gas Law Project

Your job for this project is to explain the two gas laws in such a way that someone who has never heard about them can understand. To do this, pick one of the options below.

1. Flipgrid News Report
 - a. Create a script and then read that script pretending to be a news reporter on a Flipgrid video (Flipgrid link for the assignment [here](#))
 - b. Should describe the two gas laws and compare them for full points
2. Story / Play / or Comic
 - a. Create a story, play, or comic talking about what happens to pressure, temperature, and volume with each of the two gas laws
 - b. Should describe the two gas laws and compare them for full points
3. Lesson
 - a. Create a lesson plan on how to teach the two gas laws and create all the materials needed for that lesson
 - b. Should describe the two gas laws and compare them for full points

Once you have your option chosen, create it and then either attach it to the assignment for options two and three, or turn it in on Flipgrid for option one.
