

Ocean Webquest

Go to my website and navigate to the Ocean page. Click on the link [What is an Oceanographer?](#)

1. Read through the description. Write down a definition, in your own words, of an oceanographer and what they do.

2. Still on that site, read through the descriptions of the disciplines of oceanography and pick one. Describe what that type of oceanographer does in your own words below.

Go back to the ocean page of my website and click on [Tools of Oceanographers](#) link.

3. Click on the Sonar link. Read through the description of sonar and then describe how sonar works below, being sure to use your own words.

4. Pick three other tools and complete the chart below.

| Tool Name | What is does (in your own words) |
|-----------|----------------------------------|
| | |
| | |
| | |

Click on the [Careers](#) links on my page.

5. Scroll through the list of careers and click on the name of one of the careers. Copy the description of the job below.

6. In a complete sentence, describe why you picked that career to investigate.

Go back to the ocean page and click on the [Great Barrier Reef Survey](#) link. Pick one of the sites and investigate the site.

7. Which site did you choose?

8. In a complete sentence, describe what you saw at that site.

Go back to the ocean page and click on the [Ocean Information](#) link at the bottom. Read through the description and answer the questions below.

9. What is salinity?

10. What is sea level?

If you have extra time, go through the other links on the ocean page of my website. In a complete sentence below, describe something interesting you learned below.
